Packaging Management Council

CHARTER

I. Purpose

The DOE Contractor Packaging Management Council's mission is to provide a forum for the identification, analysis and resolution of packaging issues to support the programmatic needs of the Department. The Council will promote cooperation and communications; effective resource utilization; consistent application of requirements; and standardization of packaging design, development, and operations.

The Council will address issues dealing with:

- Standardized specifications
- Better utilization of packagings
- Coordination of packaging development/modifications for budget leveraging
- Identification of the user-base for packaging
- Duplication of effort
- Uniform approach to meeting DOE Order/regulatory requirements
- Utilization of the collective pool of testing knowledge
- Operational packaging issues

Packaging Management Council

CHARTER

II. MEMBERSHIP

Eligibility for membership to the Council will be limited to DOE contractor packaging representatives. The number of members is not limited and membership duration does not expire. A member may be any packaging representative from any DOE site.

Working groups will be formed to address central issues affecting multiple sites across the complex, as determined collectively by the council members and DOE representatives. This approach facilitates a consistent approach to problem resolution and the collaboration of multiple contractors for the overall improvement of DOE packaging operations. Working groups may be composed of PMC members, DOE representatives, subject matter experts, and other individuals as deemed necessary to provide best solution(s) from a complex-wide perspective. Though this size of working groups may vary, working groups should normally consist of five or six individuals. A working group leader shall be identified and must be a PMC member. Working group members should represent sites impacted by the group task or be able to provide subject matter expertise to the issue(s) being addressed by the group. Working groups are expected to identify a scope of work, deliverable tasks, and issue a schedule for the respective tasks. Working group resolutions will be presented at PMC meetings or communicated through the PMC Coordinator to be disseminated to the PMC.
